# Data-Driven Insights and Solutions

## BeyondHIE is your source for data analysis, consultation, linkage, & reporting

As our name implies, we go beyond just providing sustainable systems and data normalization. BeyondHIE also brings extensive experience in data interpretation and insight generation to guide stakeholders' work on program design, daily operations, and quality improvement initiatives.

BeyondHIE's team consults across the entire spectrum of health care and ensures valuable data isn't left at the bottom of your data lakes.

### Value-Based Care Consulting

Our value-based care consulting is designed to help reduce costs, increase quality, and improve the patient experience. From measure design and development to predictive and comparative outcome analysis, we help our clients hone their skills and develop a proven process that gets results.

### Population Health Management Analytics

Have you ever wondered which patient population is driving up your costs or how your disease management programs are performing? BeyondHIE can help answer these questions and more. Our experience in risk management, environmental scanning, and clinician network analysis enables us to deliver key insights and themes to improve patient outcomes and identify patient populations that can benefit from focused attention.

### Total Cost of Care

We use aggregated claims data to provide cost reports for practices comparing their utilization

and costs to statewide averages and national benchmarks.

### Disparate Data Linkage at Scale

We are experts in linking data sources for complex analysis, attribution, and modeling. We blend claims, clinical, and other data sources together to build a holistic view of a patient to track and monitor outcomes.

### Enterprise Solutioning for Transparent Health Analytic Platforms and Public Reporting

Our team builds analytic platforms to support transparency of data and analysis. We are leaders in translating and reporting complex analytics to multiple audiences.

### Study Design and Intervention Impact Analysis

Our analysts strategically guide you through a tested, step-by-step model to build a study, analyze outcomes, and predict future results.

*Industry leaders have come together to create BeyondHIE.*

*We offer valuable, timely, and actionable information, delivered where, when, and how it's needed to assure optimal care and health.*
